This Collection of Tracts relating to American History was made by the late John Pickering, Esq., many of them having belonged to his father, Hon. Timothy Pickering. The volumes, twenty-one in number, are nearly uniform in size and binding; and little seems to have been admitted which possessed a mere transient value. Few of the tracts comprised in this collection are in the Boston Athenæum, and several of the most curious are not to be found in the rich collection in the library of Harvard College. The Letters of Junius Americanus have the autograph of Samuel Adams, by whom they were presented to Mr. Pickering. The Letter of Rev. Mr. Duché to Washington, which has been taken from the appendix of a larger work, contains a great number of manuscript corrections and additions, in a neat hand, and evidently written or dictated by the author, many of them important, all of them interesting, and exhibiting a singularly fine taste and clear perception in regard to euphony as well as accuracy of style.

This is a collection of old engravings, many of them published singly, some of them cut from Dutch and German chronicles, and others from books of prints depicting the *délices des Pays-Bas*. As works of art, they possess, of course, various degrees of merit; but the greater number are executed with spirit and fidelity, as well as with the minuteness characteristic of the Belgian painters and engravers; while their value is much enhanced by their having been brought together with a specific object. That object has mainly been the illustration of the history of the Netherlands at its most important epochs, and especially, during the long period of the war with Spain, in the latter half of the 16th century. Scarcely a person or public event noticed by Prescott, Motley, and other historians of that great struggle, is unrepresented in these volumes. As we turn over the pages, all the great features of the contest are vividly recalled—the field preachings, in which the strength of the Reformers was first openly displayed; the sack of Antwerp Cathedral by the Iconoclasts; the explosion of the fire-ships at Antwerp, and the long list of battles and sieges extending over thirty years, from the first success of the revolutionary party at Heiligerlee, to the final triumphs achieved under Maurice of Nassau. The later exploits of De Ruyter and Van Tromp; the departure of William of Orange (afterwards King William III.) for England; his landing at Torbay, and the great ovation—so graphically described by Macaulay—which greeted his return to the Hague in 1691, are also impressed more distinctly on the imagination by the pictorial delineations here given of them. Mingled with these, are views of the principal towns, as well as of a few cities in other parts of Europe, some on a very large scale; of public buildings, convents, country seats and pleasure grounds; of national customs, celebrations and amusements; and of particular events, such as a conflagration at Amsterdam, and the stranding of a whale on the coast of Holland, in which all the details are presented with clearness and apparent exactness. Among the portraits, are very fine and characteristic ones of William the Silent (Schoffe has made a copy from the same engraving for Mr. Motley,) Philip II., (a striking portrait, and evidently authentic, though differing much from the well known likeness after Titian,) Queen Elizabeth, Sir Philip Sidney, John of Austria, the Duke of Alva, Alexander Farnese, Olden-Barneveld, the historian Bor, and other famous personages. In a few cases, duplicates have been admitted, not, it would seem, through inadvertence, but merely to fill a vacant space until a fitting substitute could be found.

The late Richard Ford used to speak of Watson as 'Robertson's Ape.' But although this work is much below Robertson's 'Charles the Fifth' in historical research and elegance of style, it has probably been perused by most readers with a far deeper interest. Schiller, whom it incited to the composition of the "Geschichte des Afalls der Niederlande," calls it "an excellent work," though he acknowledges that in a first reading he attributed to the art of the author effects which he afterwards found to have been produced by the magic of the subject. Prescott, also, praises it for the clearness of the narration.
